July 23 - 27	MINECRAFT LEVEL 1	\$235	\$215
July 30 - Aug 3	MINECRAFT LEVEL 2 (MODDED)	\$235	\$215

What is Minecraft?

Minecraft is a video game that encourages creativity and problem solving, with limitless opportunity to build, discover, and work collaboratively to reach goals. In recent years, the game has been recognized as an educational tool for engaging kids and teens in STEM (Science, Technology, Engineering, and Math) fields such as programming, video game design & development, level design, and more.

Which Level Do I Choose?

Choose level 1 if your child has basic computer skills and is either new to Minecraft or has not taken a Minecraft camp before. Choose level 2 if your child is familiar with Minecraft or has been in a Minecraft camp before.

How is the camp different from playing at home?

Typically, kids and teens play Minecraft at home with little to no direction or goals in mind. At Minecraft camp students are empowered to discover the underlying mechanics of the game in a collaborative environment.

Beginner to advanced students in Minecraft summer camps learn how to think critically about their work with the infinite possibilities of the game. Students create themes, storylines, dialogue between characters, objectives, goals, and more, while more experienced players delve deeper into game design & development, modding, and level design.

Requirements

All students need to have a Minecraft account (with username/email and password) and their purchase of the game is tied to their account. They can purchase **Minecraft Java Edition (PC & Mac)** through the following link for \$35.00 <https://minecraft.net/en-us/store/minecraft/?ref=h>

Additionally, students for the Level 2 Minecraft camps ("Modded" Minecraft) should have a Twitch account, which they can get for free by going to <https://www.twitch.tv/> and selecting "Sign up" in the top right of the website. Twitch will be used to launch the modded platform in a way that is easy for everyone.

How to Register:

Visit the Tech Camps page of Christ Church Cathedral School's website: <http://cathedralschool.ca/programs-admission/tech-camps/> Here you will find a link to pay online. You may also visit our office to complete an application form and pay by cash or cheque. You may post-date your cheque for July 1, 2018
